Employer Name: MTA Inc.

AAA Member : Yes No

Job Title: intermediate/senior interior designer

Job Type (F/T or P/T): FT

Location(s): Calgary

Expected Start Date: March 2 2020

Website Address: www.mtalink.com

Job Description

This person is highly motivated, has a strong sense of design and wants to learn about interior design and architecture. They are a team player with strong communication, organization, and problem solving skills. They will have 7 to 10 years of experience working in an architectural or interiors office delivering projects from concept through design development and construction drawings. They will have graduated from a recognized University program and being registered with a governing association is considered an asset.

This person will work within a collaborative design team throughout all phases of project development to produce a high quality product. They will demonstrate practical knowledge of design, trends, construction methodology, materials application and manufacturer-supplier appropriateness. They will also possess knowledge of furniture, fixture and equipment (FF&E), architectural/interior finishes, lighting, art signage, color and materials to carryout design intent of the projects they are involved with.

They will be responsible for completing tasks assigned to them and will be responsible to support the Project Lead in achieving design and technical excellence and working within a collaborative frame work expressed through the 6 cornerstones of the MTA practice.

POSITION OVERVIEW

- 7 to 10 years of experience working in an architectural or interior design office delivering projects from concept through design development and construction drawings for a variety of building types.
- Graduated from a recognized University program and registered (or working towards) with the AAA or other governing associations for Interior Design.
- Highly motivated, has a strong sense of design and wants to learn about interior design and architecture.
- Team player with strong communication, organization, and problem solving skills.
- Work with the project design team throughout all phases of project development to produce a high quality product.
- Responsible for basic interior design assignments and working with the project team to assist overall effort of completing various project phases.
- Demonstrate practical knowledge of materials, detailing, construction techniques, related engineering principles, functional planning, FF& E procurement, lighting and construction costs and building codes.
- Responsible for completing tasks assigned to them including, developing project schedule, producing design drawings and assisting with the completion of construction drawings.
- Responsible to support the Project Lead in achieving design and technical excellence and working within a collaborative frame work expressed through the 6 cornerstones of the MTA practice.
- Assist with the organization and updating of the Interiors Sample Library.
- Minimal traveling for project work in our Edmonton Office.

Qualifications & Skill Sets

- Assists in the planning and execution for various phases of project delivery
- Organizes own work efforts.
- Assists in the coordination of consultants with interior and architectural documents.
- Assists in supervising project document control tasks and maintains quality control of such tasks.
- Checks and coordinates details and dimensions.
- Performs material research in preparation of project specifications.
- Contributing to detailed preparation of design and construction documents and solutions to general interior design problems. Drawing Platforms: AutoCAD experience is required. Revit experience is an asset.
- Collaborate on concept and schematic design and design development.
- Ability to work in a team environment.
- Create presentation material including presentation boards, material boards, models, elevations, and 3D renderings.
- Possess space planning skills and an interest in programming.
- Knowledge of design, trends, construction methodology, materials application and manufacturer-supplier appropriateness.
- Knowledge of furniture, fixture and equipment (FF&E), architectural/interior finishes, lighting, art signage, color and materials to carryout design intent.
