Job Description

JUNIOR DESIGNER

Henriquez Partners Architects is a full-service architectural design firm that works closely with our clients to create buildings that are culturally, economically and environmentally sustainable. We see every project as an opportunity to enrich local communities by seamlessly integrating ethics and aesthetics. Informed by this credo and by an unwavering commitment to design integrity, we have consistently demonstrated the ability to manage projects from design through to construction, and the technical expertise to create structures that stand the test of time.

We excel at large and complex mixed-use projects, such as the 1 million square foot TELUS Garden development, Woodward's redevelopment, Mirvish Village site at Toronto, and most recently the Oakridge redevelopment spanning 28-acres making it the largest development in Vancouver's history.

We are looking for a highly motivated, engaged and exceptionally creative architectural graduate to join our design team. As a Junior Designer you have strong talent in graphics and design which you will use to support Senior Architects on various projects, mainly in the front end (schematic and conceptual design), by developing design concepts and preparing presentation materials. You will be trained and mentored by experienced architectural professionals and will be part of an innovative and inspiring culture.

Qualifications & Skill Sets

Required Skills / Experience / Qualifications

- Bachelor or Masters degree in Architecture.
- Exceptional design skills with a creative eye for detail.
- High proficiency in Rhino, Grasshopper, Revit, and SketchUp.
- Excellent proficiency in Adobe Creative Suite.
- Strong organizational and multi-tasking skills.
- Superior written and verbal communication skills.
- Proven ability to create innovative ideas in collaboration with others and independently.
- Practical experience creating massing, study and presentation models.
- Experience with 3D Studio Max, V-Ray and Vectorworks preferred.
- Experience in creating photorealistic or highly detailed conceptual renderings is an asset.
